

Antirodent

Rodent Repellent Additive is a micro-porous polymer filled with mixture of odor emitting chemicals and very bitter compounds. This additive emitting chemicals which is unpleasant by rodents. This dissuades rodents from biting or chewing the polymers containing Rodent Repellent Additive. These chemicals are effective at very low concentrations and are harmless to humans. It will not change the basic properties of the product. Rodent Repellent Additive has two years of shelf life from the date of manufacture under dry condition of storage at room temperature.

Key Characteristics

Odor offensive to Rodent

Pungent unpleasant Test

Product Code	Active Content	Base Polymer	Dosage
Additive D10-1083Antirodent Master batch	10 %	PE	2-3 % Domestic & Industrial & Drip

Application

PE wire and cables

HDPE & PP Pipes

Garden Plastic Furniture

HDPE & PP woven Sac

Fiber Optic Cable Duct
